Customer Reviews

I read through this book twice as part of a pre-launch "team" set up by Pat and a collaborator of his. The kid anecdotes were kind of too "squishy-warm" for me. They almost alienated me. They may touch base with others who are motivated by wanting to spend more time watching their kids grow and develop or being at home with the wife and family more, but they made me, a non-father, non-family man, feeling kind of left out. My motivations for doing what Pat suggests are quite different. If you have kids or want to spend more time with the family, then you may connect with the anecdotes. I did not, found most of them over-explained and in need of editing. On the other hand, some of what he relates concerning his experience in the "office" world, as well as some of his experience with his own growing business were somewhat "inspiring". Funny how the one that best stuck in my mind came from a rather unpleasant-sounding boss he had had-- funny because, in the end, those of us who would want to read this kind of book would be doing so to get away from just that type of boss. When the book finally gets to the exercises, these are pretty basic pedagogy. I found a couple of them kind of 1980s "new age", others were almost infantile, all of them are valid and can be valuable to those new to getting themselves organized (especially useful will be the

material on using spread sheets to keep track of research done); however, for those who already know how to organize themselves, how to set attainable objectives and program those objectives into the larger goals they wish to achieve, you will find yourself skipping over activities suggested in the book and perhaps wondering if it was worth the \$15 it cost you.

tl;dr anyone looking to start an online business should buy this book, do the exercises in it, and save yourself a lot of wasted time, energy, and resources down the road. the strength of this book is that it is very practical. it provides step-by-step exercises to help you brainstorm ideas, narrow them down, and validate them. it's not just the why and what, but the how as well. the exercises are terrific and extremely insightful. and i like that pat does them alongside us. it was helpful to see how he processed things. the book reminds me of an "art lessons for non artists" class i took once where the instructor gave us simple steps (e.g., paint the top section blue, draw some dark vertical lines here, etc.) and the next thing you know i've got a couple walking through the forest in the rain. impressive for a guy whose previous specialty was stick figures. what i like is that anybody (regardless of business experience) can walk away from the book confident they have a viable business idea people are willing to pay for. who is this book for? - you're a budding entrepreneur looking to start your first online business - you have ten ideas in your head but don't know which to focus on - you suffer from paralysis by analysis (like myself) - you want to be confident people will pay for your idea who is this book not for?

How I wish that I had this book ten years ago. This is a **MUST READ** for all entrepreneurs (new and old). This will save people countless hours of painful failure and trial and error. I was lucky enough to get a preview copy of this book, and I can honestly say it was one of the best business books I have read in quite some time. It reminds me of recent classics like the 4 Hour Work Week and ancient ones like Rich Dad Poor Dad. I know that seems like ridiculously high praise, but this book really lives up to all that. One way to judge a book is by its impact, and this book will impact people. If you are reading this review, chances are that you are already an entrepreneur, or you want to be one. That makes you like me. People like us have **SO MANY** "great" ideas. The problem is, it's really hard to tell if the ideas are really great or not. This book completely solves the problem. Using the techniques in this book, you can tell if your idea will hold water or not -- that's the entire idea of Will It Fly. An the **IMPACT** of being able to avoid wasting time and money (over and over again) is simply huge. So, I give the book five stars on "IMPACT" alone. But another way to judge a book is on the quality of the content. What makes this book stand out is that it is the perfect combination of

Pat's personal experience, his research, and his own testing. It's REAL STUFF -- not just some mumbo jumbo theory from an egghead at Stanford B-School. Surprisingly, even a super-successful guy like Pat has had some spectacular failures mixed in with his overwhelming success. Add in lots of research and Pat's own testing and you have a book that FEELS REAL. It's something that regular people can read and understand.
