Customer Reviews

I am 58 and can clearly see the results of not having a family mission statement when my kids were young. I ran after my career and allowed my wife to parent with authoritative interruptions by me when I wanted to feel connected. The last 25 years have been repair work. I urge every couple and family, regardless of your family life cycle stage, to read this simple and valuable tool. Stephen's legacy will continue through you and your family. Apply the principles. Your family depends on it.

Just wasn't a fan. This seemed like common sense to me. I feel as though he made a lot of money off just putting common sense down in writing. I'm already a very organized and efficient mom. I was looking for the next step and this just didn't deliver for me.

Excellent, inspiring, hope-generating. No matter the current reality of your family, Covey leads you through the process of envisioning and collaborating on creating a statement of where you would like to be, thereby liberating you from the otherwise, binding baggage of the past and empowering

you towards your ideals. Recommended for traditional families, as well as single-parent families, couples, and co-parents.

I found this to be inspiring. Married to my opposite, we are constantly struggling with communication and solutions. I am flight and he is fight. I would love to try this to hopefully gain a better perspective on each other's ideas and thoughts. We will surprise each other I am sure as we have similar vision just different ways of achieving it.

My husband and I are going through a big life change. Moving out of the U.S. Army life stationed in Germany and moving back home to Oregon into civilian life. We had been talking about family mission statements for a while now but they kept getting frustrating for me because I really didn't understand my husband's approach to figuring it out. I downloaded this book and in one night, since we already had the basics down but not the wording, I was able to put out all together and create our family mission statement! Create and nurture an environment in which we are encouraged to have a positive impact on the world by sustaining ourselves in a way that keeps us healthy, happy, and active within our community.

Nice audio program! It provides all the instruction, examples, motivation and practical advise you'll need to get you and your family on the path to crafting your families first mission statement. I recommend this audio program along with the other version geared toward crafting your personal mission statement, both are similar yet different. Tony Rogers jr Author of Visionary: Making a difference in a world that needs YOU

Great book. I am impressed with this series of books. I am going to begin with the personal mission statement to give my family some inspiration.

Classic Covey! Straight to the point. Well organized. Clear action plan. Totally logical. At the end, you'll only do this when it's important to you...my suggestion...make it important today.
