## Customer Reviews

Santa brought our 20-month-old son these cards, as well as Numbers 1 to 26 Flash Cards and First Words Flash Cards (but we haven't opened those yet). These alphabet cards are colorful and engaging, but I agree with some of the other reviewers that they tend toward the flimsy side. Our

son really likes to see them, but he also really likes to \*handle\* them (which means, inevitably, folding them or otherwise expressing his delight through destruction). I think the best feature is that the set is so dang cheap that if they get folded or mutilated I won't sweat it. And less stress for me means less stress for him.

I got these flash cards for my son who is 22 months old. Just to start a little fun, educational practice if he is into it. These flash cards have the uppercase and lowercase letters, each on different cards but with the same picture. The pictures are colorful and cute with the upper or lower case letter at the top in a bold, black print. (Please see pictures below!) The cards are printed on a glossy card stock that is of a good quality. These are a great, educational tool and I'm very happy with my purchase! I also ordered the "My first words" and "My first shapes and colors" from the same seller and am equally excited with my purchase!

A friend recommended these Brighter Cards. I ordered several different card sets (shapes, letters, numbers, words, etc) and have been working them with my 2 year old. He likes the cards and the colors/ pictures on them. He also enjoys putting each card back in the box after we're done with it. All in all I think these are a good learning tool. And I love the low price!!!! My only complaint is that the cards are a bit on the thin side.....and when considering that toddlers will be handling them, they should be thicker to ensure durability and longevity.

I purchased these for my 2 year old son as I wanna start teaching him early as I can! They are made sturdy so they are not easily destructible! These would make for a great gift also or a stocking stuffer! I purchase all 3, Color & Shapes, Alphabet, & First Words. I'm a leash noticing a huge improvement in his learning capabilities. Flash cards are a great learning technique! Highly recommend these!

These flash cards are great for the price. They are flimsy and easily bent, so you have to control them but they are still helping my 18-month old daughter. Because there is both the lower and upper case with the same pictures, I've started her with matching pictures out of a group with them. It's a second way to use them as a learning tool.

Toddler daughter loves these cards. I separated out the lower case to save for when she's older. The pictures are appropriate for toddlers. The cards are not very durable, suggest supervision with

toddlers.

I love teaching my son things using flash cards. It's such a simple, yet fun and effective way to get him talking more. They are easy to read, and the pictures are vibrant, and cute. I can also lay them around my son and get him to tell me which is which, strengthening his thinking abilities. I have all of the other flash card sets made by the same company and they work positively well. I highly recommend this.

These are perfect for my 4 year old who is starting to learn the alphabet. They are reasonably priced and if he ends up ripping, chewing, or otherwise somehow destroying a few cards I won't feel too upset about it since they didn't cost too much. The pictures are great and they even include a few ideas for possible learning games. They include a card for lower case and upper case of each letter as well.
