## Customer Reviews

So poorly written I could not complete it. The sentences run together. No periods. Wording that made no sense. This is the trouble with self-publishing in the digital world without someone actually publishing your work professionally. You just have no idea what you're buying and anyone can sell content. I admit that as a professional writer myself, I am far more critical of writing than the average reader. I'm very critical of my own writing. But I let a whole lot of poor writing go in my reviews because people today do not demand good writing nor do they know what good writing is. In general. That does not include all readers or all writers. Still, good writing is far more effective and people deserve to have the opportunity to read it when they pay for it. But when you ask people to buy what they write, when you expect them to pay good money to you in exchange for your creation, you need to offer them a good experience and a reading adventure that at least appears to come from someone with a minimum of education and ability. This "book" contains many ideas thrown out in no particular order or organization. Most everything is so very basic that unless you are a rank beginner in reselling, you'll have known all this stuff ages ago. Again, I must offer a disclaimer that I am 71 and had my first thrift shop at seventeen, have been reselling along with my writing since then. So, of course this will seem basic to me. It may not to a few others. There are many good books about selling on eBay and other platforms that are professionally organized and written and published by a major publishing house and you are far better off buying one or two of

them.
