Customer Reviews

According to Carla O'Dell and Cindy Hubert, "this book tells you how leading organizations achieve great results in knowledge management, or KM, and provides the strategic principles to help you do the same in your organization." Note the use of direct address in this, the second paragraph of the Preface. O'Dell and Hubert almost immediately establish a personal rapport with their reader and sustain it as they present their material throughout the book's lively and eloquent as well as substantial narrative. Although O'Dell and Hubert have extensive experience with all manner of organizations because of their respective responsibilities with APQC (American Productivity and Quality Center), each is a world-renowned thought leader in her own right. It is to the reader's great advantage that they can - and do - bring their considerable talents to bear when examining a wealth of information, insights, caveats, and recommendations generated by hundreds of APQC-sponsored initiatives that include research studies, special reports, conferences, workshops, seminars, and publications. As its website correctly notes, "Since 1977, APQC has been focused on providing organizations around the world with the information they need to work smarter, faster, and with confidence. Every day we uncover the processes and practices that push organizations from good to great. As one of the world's leading proponents of process and performance improvement, we follow our mission to help organizations around the world improve productivity and quality by discovering effective methods of improvement, broadly disseminating findings, and connecting individuals with one another and with the knowledge they need to improve."
