Lee Haddam has assembled a book about saving money on taxes in that area of expertise most of us think is the purview of only the very wealthy. Tax havens are real and though the 'world's best tax havens' are described in detail and the variations in the laws as far as residency requirements and banking practices of each may vary, the fundamentals are here for our edification. This, by the way, is an updated 2014-2015 edition of the book so the information is current and has withstood inspection! Hadnum spends adequate time explaining the concept of tax havens ('A tax haven is simply a country that allows you to reduce the amount of tax you pay. This is a tax haven at its most basic and, although pretty obvious, it's worth bearing in mind what their purpose is without getting bogged down in the details. Let's state at the beginning that there is nothing wrong with using tax havens provided you are careful not to break any rules in your country of residence.'), the risks and the safety nets alike, presents both corporate and individual uses of these advantages to reduce reportable income, how big companies and the rich use tax havens to lower their taxes and keep their wealth strictly private and protected from the outside world, and then goes into considerable detail about the tax havens he considers best.
